

CLAIMS

5

1. Aid (10) for facilitating the learning how to play golf being attachable to a golf club having a club head and shaft which can be attached to the club head or in the vicinity of the club head on the shaft of the golf club which is having an apparatus (22) which redirecting the image perceivable in the line of vision perpendicular to the front edge of a striking face of the club head of the apparatus in the direction to the head of a golf player using the aid and which is attachable by means of magnets on the club, characterised in that the apparatus (22) is attached to the club by means of a connecting piece (14) having joints (16, 18) which are enabling a pivoting of the apparatus (22) around an axis parallel to a striking face of the club head and around an axis (20) perpendicular to the front edge of a striking face of the club head.

2. Aid according to claim 1, characterised in that the apparatus (22) is containing one or more reflective faces redirecting the image.

25

3. Aid according to claim 1, characterised in that the apparatus (22) is containing a prism for redirecting the image.

4. Aid according to claim 3, characterised in that the prism is a rectangular prism or a prism foil.

30
5. Aid according to claim 1, characterised in that the apparatus (22) is containing a TV-camera oriented in a direction perpendicular to the front edge of a striking face of the

club head and a TV-screen positioned on the shaft of the club.

6. Aid according to any of the claims 1 to 5, characterised
5 in that it is containing additionally a laser pointer.

7. Aid according to any of the claims 1 to 6, characterised
in that within the apparatus (22) a suitable cross-wire (26,
28) is positioned.

10 8. Golf club for facilitating the learning how to play golf
having a club head and a shaft with an apparatus attached to
the shaft of the club or integrated therein, redirecting the
image perceivable in the line of vision perpendicular to the
15 front edge of a striking face of the club head from the appa-
ratus in the direction to the head of a golf player using the
golf club, characterised in that the apparatus (22) is at-
tached to the club by means of a connecting piece containing
joints (16, 18) which are enabling a pivoting of the appara-
20 tus (22) around an axis parallel to a striking face of the
club head and around an axis (20) perpendicular to the front
edge of a striking face of the club head.

25 9. Golf club according to claim 8, characterised in that the
apparatus (22) is containing one or more reflective faces re-
directing the image.

30 10. Golf club according to claim 8, characterised in that the
apparatus (22) is containing a prism for redirecting the im-
age.

11. Golf club according to claim 10, characterised in that
the prism is a rectangular prism or a prism foil.

12. Golf club according to claim 8, characterised in that the apparatus (22) is containing a TV-camera oriented in a direction perpendicular to the front edge of a striking face of the club head and a TV-screen positioned on the shaft of the
5 club.

13. Golf club according to any of the claims 8 to 12, characterised in that additionally there is provided a laser pointer.
10

14. Golf club according to any of the claims 8 to 13, characterised in that within the apparatus (22) there is provided a suitable cross-wire (26, 28).
